

# Cyber Security

Protect your business and IT systems from attacks by intruders and hackers with MicroConvergent security solutions

No business can run for long if its IT systems are brought to their knees by intruders. Avoiding catastrophic downtime requires a strong security management plan that integrates reliable technology, alert system administration, and controlled user access to the Internet and other computer resources.

MicroConvergent offers two types of security services to keep your systems safe:

## Cyber Security Services

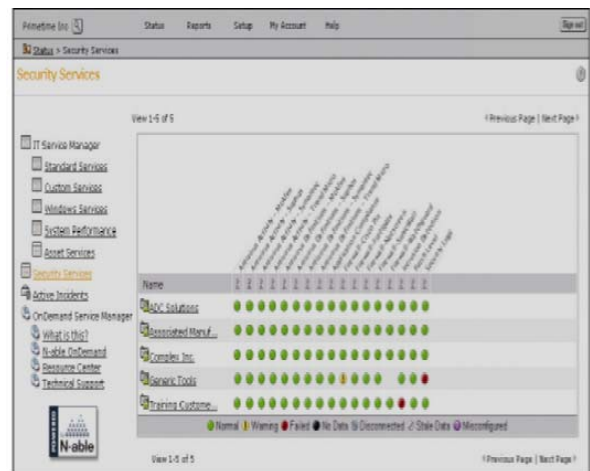

Arm your business with a formidable defensive capability against intruders. Proactively minimize security threats with a management system that alerts you for immediate action.

MicroConvergent starts by identifying and assessing your security risk with a Technology Audit. We then develop a comprehensive plan for you that includes multiple strategies to protect your systems from external and internal threats.

Our proven, expert-tested comprehensive approach to security includes continuous monitoring and implementation from our Class 4 SAS 70 Type II certified data center—a proven, state-of-the-art facility with the highest survivability and security standards available.

MicroConvergent Cyber Security Services feature:

- ✦ **Continuous security sweeps:** proactively identify potential defensive breaches, before mischief happens.
- ✦ **24/7 monitoring and reporting:** consistent with industry-specific legislation and regulations.
- ✦ **Rapid Response to alarms:** alerts you of harmful events across one or more devices.
- ✦ **Supply integrated performance** with our managed firewall service.

MicroConvergent Dashboard

## Managed Firewall Service

MicroConvergent can reduce the complexity of protecting your critical infrastructure by handling all aspects of your firewall maintenance. Designed to be flexible, scalable, and secure, our managed firewall service delivers:

- ✦ **High availability:** we continuously monitor your firewall to constantly maintain it in perfect operating condition.
- ✦ **Flexible configuration:** our managed firewall service provides you with a customized configuration that works best with your specific network setup.
- ✦ **Unmatched expertise:** our professional security engineers manage your firewall to ensure any configuration changes and upgrades are handled seamlessly.
- ✦ **Rapid scalability:** we monitor your network and internal assets and can respond quickly to provide increased capacity for your firewall before an issue arises.
