

On-Demand Data Backup

Your data is safe. Feel free to sleep at night.

MicroConvergent's On-Demand Data Backup is an online data recovery system for your business. With this automated service, you can safeguard your data confidently and easily recover from an unexpected loss.

Why back up your data?

In today's high-tech world, one thing is certain—data will be lost. Whether caused by hard drive failure, human error, a computer virus or theft, every business is susceptible to data loss and will experience it at some point. The key to your business prevailing through such a loss is to be prepared with a reliable backup and recovery solution.

Why choose MicroConvergent?

MicroConvergent offers the industry's premier data backup and recovery service—recognized as reliable, secure, easy-to-use and cost-effective. Our fully automated online backup and recovery solution is specifically designed to keep organizations in full operation mode, even in the event of a major data loss. Using the highest levels of compression and encryption available, we enable businesses to automatically protect digital information and restore it at anytime from any location.

You benefit from the best automated backup technology available, military-grade security through a Class 4 Data Center, 24/7/365 access to your data and world-class customer support.

How does it work?

On-Demand Data Backup is simple to set up and use. After a one time software installation and set up, you can start securing your data. Your data is encrypted and stored on our servers. Only you have the access key, so your data is confidential, secure, and available only to you. On-Demand Data Backup is all automatic and is easy to schedule. And when it comes to recovering data, no other solution is as fast or dependable for restoring your files whenever or wherever you need them.

- ✦ Our agent-less software is installed onto one computer or server.
- ✦ You establish the automated backup schedule.
- ✦ The data is compressed and encrypted.
- ✦ The data is transferred offsite to our secure Class 4 Data Center. A report is generated.

- ✦ The data is backed up again, providing a second offsite copy.
- ✦ The data is stored on hard drive disk arrays for rapid online recovery.
- ✦ The data can be restored at any time from any computer.
